Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the memory support (claim 18) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. Claims 18,19,20 are rejected under 35 U.S.C. 102(b) as being anticipated by Powers et al (6360120).

The memory support called for in the above claims could be construed as the adapter of the Powers device. The adapter of Powers could be construed as being 'on the cable' in that it is in physical contact with the cable.

Claim Rejections - 35 USC § 103

3. Claims 1-4,6,11-17,21,22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powers et al.

Re claim 1, one of ordinary skill in the art is deemed to consider the phrase 'an operator workstation' to be broad enough to encompass a variety of devices, including external defibrillators and training devices, as set forth in the abstract of Powers. Such devices allow for interaction with the user, such as entering data about the patient or answering questions posed by the AED regarding the patient's condition.

Re claim 11, one of ordinary skill would know that a variety of differently sized electrodes would have to be applied to the patient, depending on the patient's size. For example, an adult would need larger electrodes than a pediatric patient. Thus, a sensor adapter would have been obvious and useful to have with the device of Powers. (Such a teaching can be found in the patent to Morgan, previously cited, in col. 4, lines 44+). Further, to put the memory device in the sensor adapter instead of the station adapter is considered a mere obvious design choice.

Art Unit: 3762

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Powers et al in view of Lockery et al (6533723).

To have the ability to sense a variety of different patient conditions, as taught by Lockery, would have been obvious in that a more complete picture of the patient's health would be available, and thus better care given.

Allowable Subject Matter

5. Claims 7-10,24-39 are allowed.
6. Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
